Continuation of 10. Other (including any explanation in support of the above items): The Summary does not provide clear & respective reference to the specification of each and every respective independent claims and the separately argued respective dependent claims. For example, in claim 1, i.e., page 4 of the Brief, the limitation "independently of a..CPU" is not supported by the referenced specification section (e.g., .., the referenced section supports-"independent of the host OS"). In claim 5, i.e., page 4 of the Brief, the limitations "configured to operate notwithstanding...malfunctions" is not supported by the referenced specification section. The applicant must provide CORRECT SECTION that ACTUALLY support the claimed limitations. The applicant should carefully review the Brief in its entirety for the proper compliance with the 37 CFR 41.37 & MPEP 1205 & 1205.02. The examiner suggest the applicant to carefully consider all of the involved claims for the proper compliance with the 37 CFR 41.37 & MPEP 1205 & 1205.02 .
